A brand new Italian label, NERO3 unveiled its first collection during the latest Milan Salone. The 30-years' experience in realising ideas — manufacturing project-specific furniture and furnishings for stores, hotels and offices — is now invested in a range of furniture designed by architects. Each object is the result of an in-depth stylistic and technical research based on the use of natural (and therefore noble) materials and backed up by ages of Italian manufacturing tradition. Produced in limited editions, controlled down to the very last detail, these pieces are created to become the protagonists of their environments.

ZDT1, a table designed by Milan-based Umberto Zanetti, is made of stainless steel with a brushed working surface. Available in two lengths — 1,8 or 2,7m.
